

REMARKS

Responsive to the restriction requirement imposed in the outstanding Official Action, Applicants elect Group II, claims 11-27, drawn to a method for producing a transistor for active matrix display, without traverse.

Responsive to the election of species requirement, Applicants elect species I, a transistor comprising a top gate electrode. The claims 11-19 and 22-27 are readable on the elected species.

With respect to the election of species requirement relating to the particular active material of the pixel (i.e., emissive organic, liquid crystal, and emissive polymer), none of the elected claims refers to this feature. Accordingly, it is believed that no further election of species is required based on the election of Group II.

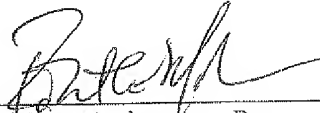

In view of the above remarks, the above mentioned election of invention and election of species are believed to be fully responsive to the outstanding Official Action, and a favorable action on the merits is respectfully requested.

Should there be any matters that need to be resolved in the present application, the Examiner is respectfully requested to contact the undersigned at the telephone number listed below.

The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 25-0120 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17.

Respectfully submitted,

YOUNG & THOMPSON
